GAME RULES

Important! Please make sure the game board is oriented correctly before playing, as shown in the images. There are two types of challenges included: 24 with no wolf, and 24 featuring a wolf.

🌙 Nighttime: Challenges featuring the wolf

The object of these challenges is to fit the three puzzle pieces on the board so that the houses COVER the pigs, protecting them from the wolf!

- 1 Set up each challenge by placing the pigs and wolf on the game board as indicated in the booklet. Some challenges don't require all the pigs.
- 2 Place the 3 puzzle pieces on the game board, so that the houses fit over the pigs, keeping them safe INSIDE. The wolf should stay outside.
- 3 There is only 1 solution to each challenge. If a challenge uses only 1 or 2 pigs, some houses will stay empty. Two squares on the game board outside the houses will also stay empty in every challenge.

Tips for parents and teachers Although the solutions may seem obvious to an adult, they can be quite difficult for young children. Most children will need assistance when they start playing the game. You can encourage them by asking questions, such as:

- Which house will fit over this pig?
- Why do you think this puzzle piece needs to be placed there?

If children still have problems with the challenges, it can be a good idea to start with recreating the solutions.

GAME RULES

Important! Please make sure the game board is oriented correctly before playing, as shown in the images. There are two types of challenges included: 24 with no wolf, and 24 featuring a wolf.

Daytime: Challenges with only pigs (wolf piece is not used)

The object of these challenges is to fit all the puzzle pieces on the board so that the selected pigs remain OUTSIDE their houses.

- 1** To set up the game, place pigs on the game board as indicated in the selected challenge. Sometimes only 1 or 2 pigs will be used, especially in early challenges; in these cases the remaining pigs will not be needed.
- 2** Place the 3 puzzle pieces on the game board, so that the pigs are playing OUTSIDE the houses. The indicated position of the pigs cannot be changed.
- 3** There is only 1 solution. You can find it on the back of each challenge. If a challenge only shows 1 or 2 pigs, 1 or 2 squares will remain empty on the game board.

Tips for parents and teachers Although the solutions may seem obvious to an adult, they can be quite difficult for young children. Most children will need assistance when they start playing the game.

You can encourage them by asking questions, such as:

- Where do you think this puzzle piece can be placed?
- Why do you think this puzzle piece needs to be placed there?

If children still have problems with the challenges, it can be a good idea to start with recreating the solutions.
